1981 – IBM

introduces its first personal computer featuring the Intel[®] 8088 microprocessor. It sparked the PC revolution and set industry standards that still exist today. The IBM platform enabled hardware

學習需要？應用需要？

A hand holding a white smartphone. The screen displays a home screen with a Google search bar at the top, a digital clock showing 05:16, and the date Tue, January 06. Below the clock are several app icons: Camera, Gallery, Settings, Security, Tools, Play Store, Browser, and Contacts. The phone is held in a hand, and the background is a soft, out-of-focus light blue.
